

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. APPLICATION NO. 09/298,910
ATTORNEY DOCKET NO. Q54131

a base station in radio communication with said means for producing dialing signals, said base station including means for deciding whether a dialing signal represents a final digit of a dialed telephone number or not, wherein

DK said means for producing dialing signals includes a telephone set having a dial pad with keys, a dialing signal being generated when a key of said dial pad is pushed.

Sub E2 12. (Twice Amended) A radio access system comprising:

means for producing dialing signals;

means for transmitting the dialing signals each time they are produced; and

D2 a base station control station in radio communication with said means for producing dialing signals, said base station control station including means for deciding whether a dialing signal represents a final digit of a dialed telephone number or not, wherein

said means for producing dialing signals includes a telephone set having a dial pad with keys, a dialing signal being generated when a key of said dial pad is pushed.

Sub E3 14. (Twice Amended) A radio access system comprising:

means for producing dialing signals;

means for transmitting the dialing signals each time they are produced;

D3 a base station in radio communication with said means for producing dialing signals; and

a base station control station in radio communication with said means for producing dialing signals through said base station, said base station control station including means for

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. APPLICATION NO. 09/298,910
ATTORNEY DOCKET NO. Q54131

deciding whether a dialing signal represents a final digit of a dialed telephone number or not,
wherein

DB said means for producing dialing signals includes a telephone set having a dial pad with
keys, a dialing signal being generated when a key of said dial pad is pushed.

Please add new claims 16 and 17 as follows:

*93
94* 16. (New) A radio access method comprising the steps of:
producing dialing signals when a key of a dial pad is pushed;
transmitting dialing signals each time they are produced; and
deciding at a base station whether a dialing signal represents a final digit of a dialed
DK telephone number or not.

17. (New) A radio access method comprising the steps of:
producing dialing signals when a key of a dial pad is pushed;
transmitting dialing signals each time they are produced; and
deciding at a base station control station whether a dialing signal represents a final digit
of a dialed telephone number or not.
